• Traveling

SUMMER INTERNSHIP

ADRDE (DRDO) | Software Engineering Intern
June 2023 – August 2023 | Agra, Up
- Collaborated closely with a team to created a **sensor dashboard project**
- I have collaborated with my team members to develop the dashboard with **chartjs react**
- The dashboard allow users to visualize the data coming from various sensors like dht11, lm35 using arduino.
- Data coming from sensors stored in a MySQL database using a node server.

PROJECTS

EDTECH PLATEFORM/ | Full-stack Web Application (MERN) | Link | | GitHub

- **Description:** Created an EdTech Web Application using the MERN (MongoDB, Express, React, Node.js) technology stack. This platform enables users to access online education classes.
- **Features:**
1. Implemented a responsive and user-friendly interface for both desktop and mobile users.
2. Integrated video streaming capabilities for online classes.
3. Utilized APIs to fetch course data within the application.
4. User registration and profile creation with personalized information.
5. Options for tracking progress, saving preferences, and maintaining a learning history.

ESTATE WEBSITE | MERN Application | Link | GitHub

- **Description:** MERN Estate is a comprehensive real estate management system designed to streamline property listing, buying, selling, and renting processes. .
  - Features:
  1. Secure user registration and login functionality with role-based access control, ensuring data privacy and security.
  2. A user-friendly interface for creating, editing, and managing property listings. Users can upload property details, including images, descriptions, amenities, and pricing information.
  3. Advanced search and filtering capabilities allow users to quickly find properties based on criteria such as location, property type, price range, and amenities.
